### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brian Dutton on 7/22/2004.

The application has been amended as follows:

#### **In The Claims**

In claim 7, line 9, delete ".", and insert - - and further wherein the ground yarn knotting yarn is a warp ground yarn knotting yarn, and some or all of the upper surface side warps are the warp ground yarn knotting yarns in the repeating unit. - -, after "upper surface".

Cancel claim 8.

The following is an examiner's statement of reasons for allowance: independent claim 7 and the respective dependent claims are allowed because the instant invention discloses a multi-layered industrial fabric with specific yarn location and weave design characteristics not taught by the prior art. Specifically, the instant invention differentiates from the nearest prior art by requiring that the ground knotting yarns are warp yarns and are present on the upper surface, while the prior art shows the knotting yarns to be cross machine or weft direction yarns.
